The HPE price index for sawn timber and wood-based products for wooden packaging and pallets

The price index for sawn timber and wood-based materials for wood packaging and pallets will be determined monthly from now on (as of April 2021) by the **Bundesverband Holzpackmittel - Paletten - Exportverpackung (HPE) e.V.** in cooperation with the **Rheinische Friedrich - Wilhelms - Universität Bonn**, due to the permanently increasing volatility and constant dynamization of price developments for several years.

The individual indices show the evolution of purchasing prices for sawn timber and wood-based products as used in the sector. They cover native supplies and those from abroad. Other additional cost factors, such as for quality sorting, are not included. The price indices and their evolution look as follows:
